## Report: Participative Learning through Role-Play

### Introduction

Participative learning is an effective teaching methodology that encourages students to take an active role in the learning process. Role-play is a popular participative learning technique that fosters student engagement, creativity, and critical thinking.

### Objective

The objective of this report is to highlight the effectiveness of role-play in promoting student participation in teaching and learning.

### Methodology

A role-play activity was conducted in a classroom setting with 30 students. The topic was "Customer Service" and students were divided into pairs to play the roles of customer and customer service representative. The activity was facilitated by the teacher, who provided guidance and feedback throughout the process.

### Outcomes

The role-play activity yielded several positive outcomes, including:

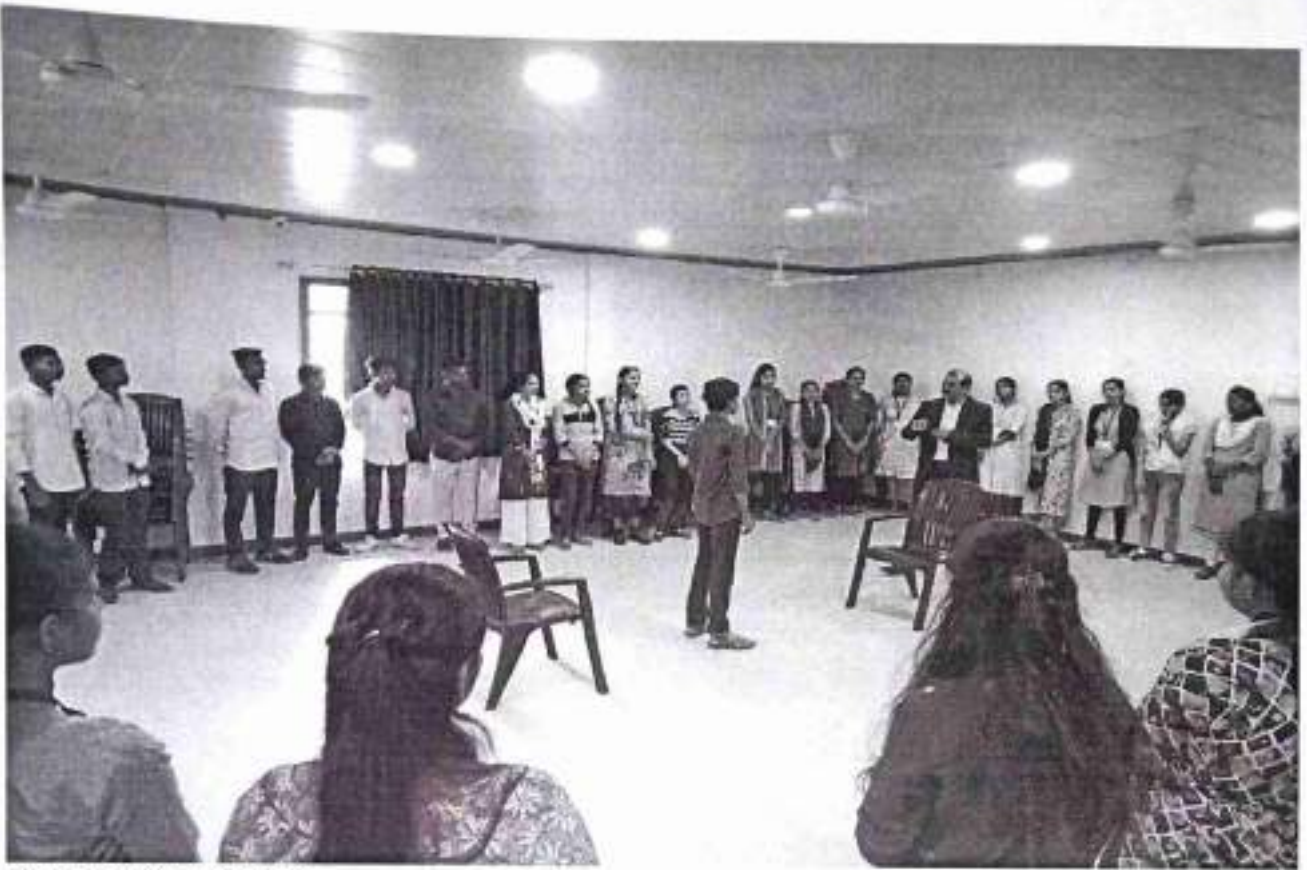

1. Increased student participation: All students actively participated in the role-play activity, demonstrating their understanding of the topic.
2. Improved communication skills: Students developed their communication skills by interacting with each other in a simulated real-life scenario.
3. Enhanced critical thinking: Students had to think critically and respond appropriately to different customer service scenarios.
4. Boosted confidence: Students gained confidence in their ability to handle customer service situations.

The role-play activity was a resounding success, demonstrating the effectiveness of participative learning in promoting student engagement and understanding. By incorporating role-play into their teaching practices, educators can create a more interactive and immersive learning environment that benefits students of all learning styles.

**REPORT OF STAFF ACADEMY LECTURE SERIES**

A seminar was organized in Auditorium Hall (K - 04) from Monday 15<sup>th</sup> January to Saturday 20<sup>th</sup> January 2024 under Staff Academy at Maratha Vidya Prasarak Samaj's Karmaveer Punjababa Gowardane Arts, Commerce and Science College, Igatpuri from 11.00 am to 12.00 pm. Under the guidance of Hon. Principal Dr. Kiran Rakibe, interdisciplinary knowledge should be exchanged. This Staff Academy Lecture Series was organized with the aim of benefiting professors of other disciplines in their lives through our knowledge.

**Staff Academy Lecture Series Schedule**  
(Monday, 15/01/2024 to Saturday, 20/01/2024)

Sr. No.	Date	Lecturer's Name	Topic
1.	15/01/2024	Mr. N. S. Bombale	Global warming
2.	16/01/2024	Mr. A. Y. Sonavane	Taxation and Saving
3.	17/01/2024	Mr. K. K. Chourasiya	Heart Attack and Precautions

6.	20/01/2024	Mr. M. R. Dhebade	Investment in the Stock Market

- On Monday, January 15, 2024, Mr. N. S. Bombale guided all the professors on the topic of global warming. On this occasion, Hon. Principal Dr. Kiran Rakibe was present as the chairman. Mr. N. S. Bombale said in his commentary that the temperature has increased at a rate never seen before in the last hundred years. Of the few mountain peaks in the equatorial region that are covered with snow, Mount Kilimanjaro is famous. The snow cover on this mountain peak is only 25 percent compared to 1906. The glaciers in the Alps and Himalayas are retreating and the snow line, the height up to which there is permanent snow cover, is moving up and down. The Khumbu glacier, which is needed to reach Everest, has moved back five km in the 50 years from 1953 to 2003. The average temperature in Nepal has increased by 100 degrees Celsius since the mid-1970s, while the permanently snow-covered region of Siberia has recorded a 1.50 degree Celsius increase in temperature in the last 30 years, i.e. from 1975-76, and the snow cover here is shedding a layer of 20 cm every year. There are many examples of global warming. Hon. Principal Dr. Kiran Rakibe stated in the presidential address that the continuous increase in temperature is affecting human life. The presidential address stated that the continuous increase in temperature is affecting human life. The presidential address stated that the continuous increase in temperature is affecting human life. Dr. Kiran Rakibe congratulated Mr. N. S. Bombale for his detailed presentation of the topic. The vote of thanks was expressed by Prof. V. B. Rathod.

- On Tuesday, 16/01/2024, Mr. A.Y. Sonawane guided all the professors on the topic of Income Tax & Saving. On this occasion, Hon. Principal Dr. Kiran Rakibe was present as the chairman. Mr. A. Y. Sonawane said in his commentary that everyone wants to save income tax, but often due to not knowing the right methods, some people can save less tax. Due to this, their tax liability becomes very high and their hard-earned money goes to tax. Today we are going to tell you about 5 such methods, which can benefit you for tax saving. Tax exemption on pre-nursery fees. If your child is in playgroup, pre-nursery or nursery, you can get tax exemption on his fees. Interestingly, this tax benefit was implemented in 2015 itself. However, it has not become popular like school education fee deduction. You can get this exemption under Section 80C and a maximum of two children can get this benefit. Parents get interest. If your parents are in the lower tax bracket or are not yet taxable, then you can take a loan from them for house expenses and pay interest on it. Also, do not forget to take a certificate of interest payment to get tax exemption. If you cannot provide this proof, then you will not get tax exemption. You can get this tax exemption under section 24B of the Income Tax Act. The maximum exemption that can be availed under this is Rs 2 lakh. Pay house rent to parents. If you are living with your parents and cannot claim HRA, then you can claim HRA by paying rent to your parents. If you are thinking that this is wrong, then it is not so. Under section 10(13A) of the Income Tax Act, you can get tax exemption on HRA by showing that you are the tenant of your parents. Under this, you can show that you pay house rent to your parents. Also, if you are availing any other housing benefit, then you will not be able to claim HRA. Take health insurance for parents or wife and children. You can save your tax while taking care of the health of your parents. If you take health insurance for your parents, you get tax exemption on the premium amount. You will get tax exemption on premium up to Rs 25,000 on health insurance for parents below 65 years of age. If you are above 65 years of age, you will get tax exemption up to Rs 50 thousand. Tax exemption on medical expenses of parents. You can also get tax exemption on medical expenses of your parents. However, for this, your parents must be 60 years of age or above. At this age, they often have to incur medical expenses, on which you can get tax exemption under section 80D. Under this, you can get tax exemption on a maximum of Rs 50 thousand. Hon. Principal Dr. Kiran Rakibe said in his presidential address that all of us will definitely be able to save tax due to this lecture. There is a class of teachers. They do not have other sources of income. So everyone will benefit from this.
- On Wednesday, 17/01/2024, Mr. K.K. Chaurasia guided all the faculty on the topic of 'Heart Attack and Precautions to be Taken'. On this occasion, Hon. Principal Dr. Kiran Rakibe was present as the chairman. Mr. K.K. Chaurasia, while elaborating on the topic of 'Heart Attack and Precautions to be Taken', said that you feel a tight pain around your chest. The pain moves from your chest to your arm, shoulder and neck. What could be the meaning of your pain? It could be a heart attack, could it be a major one? A heart attack is caused by the interruption of blood supply to some part of the heart. When the blood flow is blocked, your heart becomes starved of oxygen and the heart cells die. A

MARATHA VIDYA PRASARAK SAMAJ'S  
K.P.G. ARTS, COMMERCE & SCIENCE COLLEGE, IGATPURI

Affiliated to Savitribai Phule Pune University, Pune

hard substance called plaque can build up in the walls of your coronary arteries. This plaque is made up of cholesterol and other cells. A heart attack can occur due to the buildup of plaque or the rupture of one of these plaques. We are not sure why heart attacks happen. You can have a heart attack when you are resting or sleeping, or after a sudden increase in physical activity, when you are outside in cold weather, or after sudden, severe emotional or physical stress, such as an illness. So, how is a heart attack treated? If you go to the hospital for a suspected heart attack, a doctor or nurse will listen to your chest with a stethoscope. Your blood will be tested to look for heart damage. A coronary angiography test can show your doctor how well blood is flowing through your heart. If blood is flowing slowly or not at all through your coronary arteries, you either have a narrowed or blocked artery. Other tests can look at your heart valves and chambers and check for abnormal heart rhythms. If you have had a heart attack, your doctor may perform an emergency procedure called angioplasty. This surgery or procedure can open narrowed or blocked blood vessels. They usually place a small, metal mesh tube called a stent in your artery to keep it open. You may also get medicine to break up the clot in your artery. Sometimes, doctors perform heart bypass surgery to get blood flowing to your heart muscle. After you're treated in the hospital for your heart attack, you may need to take medicine to thin your blood, protect your heart, or improve your cholesterol levels. You'll need to take these medicines for the rest of your life. People who have had a heart attack also need cardiac rehabilitation. This will help you gradually increase your exercise level and learn how to follow a healthy lifestyle. After you've had a heart attack, you're more likely to have another one. How well you do after a heart attack depends on the extent of the damage and where the damage is to your heart and what steps you take to prevent another one. If your heart can't pump blood around your body as well as it used to, you may develop heart failure, and you'll need treatment for the rest of your life. Usually, a person who has had a heart attack can gradually return to normal activities, but you will have to take steps to prevent another heart attack. Hon. Principal Dr. Kiran Rakibe, in his presiding remarks, said that the lives of all of us have become dangerous. Due to unhealthy diet and the constant rush, this problem is currently being faced at a very young age. Everyone needs to take care of their health at all times. Life is the world. Prof. V. B. Rathod expressed his gratitude.

- On Thursday, 18/01/2024, Mr. Chetan Chaudhari guided all the professors on the topic of 'Computers and Teaching'. On this occasion, Hon. Principal Dr. Kiran Rakibe was present as the chairman. Mr. Chetan Chaudhari, while explaining the topic of 'Computers and Teaching', said that the present era is known as the era of computers. This device called computer has had a comprehensive impact on today's social life. A computer is an electronic device. It has a system or system that processes symbols and is designed and managed in such a way that the process of accepting, storing and processing information and preparing results or answers is automatically carried out by following instructions made up of already stored steps. Computers are used for various purposes in sectors/departments like railways, aviation, health, banks, industries, education, research,

insurance sector, electricity department etc. Due to some of the capabilities of computers, how can the field of study and teaching in education be an exception to this? The use of computers is becoming more and more common in daily life. Due to the tremendous growth in computer science, computers are also a useful tool for various tasks in the field of education. What is needed today is to use computers creatively and with due caution in the educational process. With some useful application software, computers can be used as tutors and tools in the field of education. 1. In schools, computers help teachers in preparing mark sheets as well as in the educational process. 2. In various offices, it helps them to do their work easily and quickly. 3. Information and communication technology can help in storing and following up information related to school health check-ups. 4. In audiovisual media, effective and attractive cartoons, drawings, 3D pictures are made entirely by computers with the help of graphics and animation. On this basis, educational programs related to language subjects and in science, mathematics, and social sciences can be created. 5. The use of computers in education has been increasing in the last few decades. Computers have brought about radical changes in our lives. Today, there is almost no field where computers are not used. 6. With the help of computers, the self-study process becomes effective and easy. 7. It becomes easier to use the sequential lesson study method with the help of computers. 8. It becomes easier for the student to study any subject at his own pace. 9. Pictures related to the stages of human development, pictures of related scientists, necessary pictures and maps in the lesson elements can be scanned with the help of machines and stored on the computer and used in teaching as per the need. 10. By using computers effectively in the school laboratory, learning experience can be provided through practical work. 11. Information communication technology can also be used effectively for contextual knowledge and evaluation. 12. There is more scope for the use of information communication technology in the subjects of music, sports, work experience, painting. 13. Various educational and practical references can be found with the help of the Internet. The computer does not stop at helping the teacher only, but the computer is ready to do the teacher's work itself. The computer can also do the work of presenting direct instruction. This working technique of the computer is called Computer Assisted Instruction (CAI). The salient features of this technique are as follows: Dialogue: In the dialogue type, the computer is filled with specific information. The information that students need while studying can be obtained by asking the computer. This refers to the type where the student asks the computer questions and gets the answer. Revision and Practice: In this, the teacher is expected to introduce new concepts to the students in a traditional way and entrust the responsibility of revision based on it to the computer. The role of the computer is limited to testing specific knowledge. Enquiry: In this, the student asks the computer for information and the computer gives him that information or tells him where to get that information. Problem Solving: Here the computer is used like a calculator to solve the student's problems. Tutorial: This type is more complex. There are lessons based on sequence. First, the computer asks questions based on prior knowledge. If the student answers, the next part is presented, otherwise the part based on prior

knowledge is given for practice and the question is asked again. Here, feedback reinforcement is used. A useful tool for self-study. Simulation - In this technique, teaching is done using an exact but realistic replica of an activity or object to study an activity or object. For example, we cannot show the students how rays are emitted from uranium or how a nuclear explosion occurs. For this, we can present that instruction in front of the students using a simulation model in the computer. Hon. Principal Dr. Kiran Rakibe, in his presidential address, elaborated on the importance of technology and said that recently we cannot teach without technology. If we want to move forward with the world, we will have to imbibe this knowledge.

- On Friday, 19/01/2024, Mr. D. S. Antapurkar guided all the faculty on the topic of 'Medicinal plants'. On this occasion, Hon. Principal Dr. Kiran Rakibe was present as the Chairman. Mr. D. S. Antapurkar, while elaborating on the topic of 'Medicinal plants', said that each plant or medicinal plant has a specific quality and can be used to treat many ailments and diseases. Medicinal plants like aloe vera, turmeric, basil, pepper, cardamom and ginger are commonly used in many Ayurvedic home remedies and are considered the best help in fighting throat and skin related ailments. Turmeric is the powder of the tuber of a plant. In our country, it is used in food and is also used as medicine. Its medicinal properties have been known to everyone for hundreds of years. Turmeric powder helps in stopping blood and healing wounds. There is also a method of applying turmeric and oil on scrapes or cuts. There is also a method of applying a paste of milk, gram flour and turmeric while bathing. Triphala powder is a medicinal mixture of three fruits: amla, girda and beheda. Its powder is taken internally for constipation, diabetes and weight loss. When applied externally, it is useful for healing wounds. If Triphala powder is applied while bathing, it is also useful for the skin. This powder is also used for brushing teeth. If there is swelling in the throat, if there is bleeding from the gums or when the mouth hurts, gargles are made with its extract. Massage with oil is good for joint pain. But medicines are also needed. Licorice is a very beneficial plant. Its dried leaves are available. If there is a sore throat, the powder of its stem is mixed with honey. This powder also cures superficial cough in the throat. If the powder is taken with cow's milk, it is used to increase the capacity of the brain. This plant is cooling in the body. That is why it is used for diseases of bile. For glowing skin, mix jaggery powder and turmeric in milk. Taking asparagus powder with milk is used as a tonic and improves health. For acidity, mix avalya powder in ghee and take it in the stomach. Gulkand and ghee are useful for stomach irritation. For dry cough, drink hot or lukewarm water. If you have diarrhea, take lemon juice, sugar and salt to replenish water in the body. Honey is good for dry cough. It is also useful to mix other medicines in honey. If you are underweight, milk and ghee are useful for increasing it. If you cannot sleep, massage your head with oil. Also, massage your feet with cow ghee. You will get more information about herbal medicines along with information about other diseases and topics. Hon. Principal Dr. Kiran Rakibe, while explaining the importance of medicinal plants in his presidential address, said that many medicines are in our homes but we are

- On Saturday, 20/01/2024, Hon. Principal Dr. Kiran Rakibe praised all the professors who took active participation in Staff Academy and voluntarily shared their knowledge with other colleagues. We will give priority to those who were still supposed to give lectures in Staff Academy but did not get the opportunity next year. All the professors who took active participation in this and listened to all the lectures quietly are also appreciated. We will definitely benefit from this knowledge. Let the people around you benefit from this. I also appreciate the head of the Staff, Prof. V. B. Rathod and his colleagues for making this lecture series a success. The vote of thanks was given at the closing ceremony by the afternoon session head, Mr. K.K. Chaurasia. The closing ceremony was moderated by Prof. V. B. Rathod.
