## Conclusion

In conclusion, learning how to use a fire extinguisher is an essential safety skill that every people should know. By following the simple **PASS** technique—**Pull the pin, Aim at the base of the fire, Squeeze the handle, and Sweep side to side**—you can take quick action to control a small fire before it spreads.

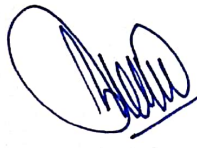

It's important to:

- **Stay calm** and act quickly when facing a fire, but always prioritize your safety.
- **Know the different types of fire extinguishers** and which one is right for different kinds of fires (like paper, liquids, or electrical).
- **Ensure you have an escape plan** and never hesitate to call for help if the fire is too large to control.

Remember, fire extinguishers are only effective for small, contained fires. If the fire is out of control, always evacuate immediately and call emergency services. Being prepared and knowing how to use a fire extinguisher could make a life-saving difference in an emergency. Stay safe and share this knowledge with others.
